Email: rti@rescue1.com

In just over a decade we have seen the concentration of TEMS expertise move from a very few to its present state of being a part of almost every special operations team in the United States and many abroad....

...Vice Admiral Richard Carmona, M.D.,
U.S. Surgeon General (ret)

The **tactical** training provided by Rescue Training Inc is of a sensitive nature, and is not provided to the general public. It is provided only to those that have a "need-to-know". All applicants must be certified EMTs or equivalent and working within the public safety arena (Police, Fire, or EMS), the military (DoD), or working within a division of the **US Department of Homeland Security**.

PHYSICAL ACTIVITY / RISKS

Rescue Training Inc. - Successful completion of this course will result in EMT-Tactical certification (45 CEU hrs) and TCCC certification through NAEMT (16 CEU hrs)

Students will be exposed to a variety of conditions, which may include, but not limited to:

- CS or other riot control agents
- Water Borne Hazards
- Blank firing weapons
- Pyrotechnics (smoke & distraction devices) / Flashbangs
- Darkness with austere field conditions
- Field training under rigorous and demanding psychological stress
- Simulated tactical operations
- Operating in tactical gear during extreme weather conditions including heat, cold and precipitation

Applicants who are not in excellent physical condition and who do not participate in a regular physical conditioning program should seek the approval of their physician before participating.

Rescue Training Inc memberships includes:

The National Tactical Officers Association, The North Carolina Tactical Medical Association, The Florida SWAT Association, International Tactical EMS Association, and The Better Business Bureau

Providing out-of-hospital care in the austere environment of a tactical law enforcement mission requires special judgment and skills not taught in standard EMT curricula. The Tactical Medic course is designed to fill the gap in training which has become more apparent as the violence associated with drug activity and terrorism continues to increase. This is accomplished by enhancing the participants' ability to support a tactical law enforcement team and survive a violent street encounter... ..
